## COAL VALUES IN WASHINGTON CO.

John W. Boileau Gives Expert Opinion Before County Commissioners

#### ON THE ASSESSMENTS THERE

Hold That If Anything Assessment of \$114 an Acre in Northern Townships Is Too Low-The Opinion of Other Experts.

According to John W. Boileau, expert on coal mining, from Pittsburg, the townships in the northern part of Washington country are to be the future this vein was of uniform thickness coal fields of Pennsylvania for steam all over the township and it it was coal. They are situated nearer Lake not it would be semething new in the Erie and there will be great demand coal field. He said that he had from the lake consumers for the coal bought coal in Cross Creek, Jefferson production of this region. He stated Mt. Fleasant and Chartiers townships production of this region. He stated the production of this region. He stated the production and commerce commission revised the commerce commission revised the commerce commission revised the the commerce commission revised the commerce commission revised the commerce commission revised the commerce townships. The last coal he purchased in Cross Creek was about the stand consequently the demand for coal he bought in Jefferson townships the also paid \$100 per acre for it. For the stand coal from that section is be said, nothing could be

steam coal from that section is a section. The section is a section in the section in the section is a section in the section is a section in the section in the section is a section in the section in the section is a section in the section in the section in the section is a section in the section in the section in the section in the section is a section in the section I would not be surprised if within the mext few days the interstate commerce commission would hand down a revised schedule that will change the Pleasant were \$81, \$56 and \$110 revalue of the coal lands here considerably. The northern part of the country

As regards the coal valuations in especially, is bound to become a great coal center."

Spectively.

As regards the coal valuations in compared with the valuations several coal center."

Such was in part the testimony years ago when he bought coal from given in the bearing of the sixty some there, he said, the value of the Pitts given in the hearing of the sixty some odd appeals from the triennial coal and surface assessments that have judging from the prices that the armound in the interest of the come in from the townships of Canton. Jefferson, Mt. Pleasant, Smith, Independence, Cross. Creek, West. Pike. Run and Hopewet in Washington county and heard by Judge McIlvaine. The hearing of the testimony for the appellants was concluded last week. The testimony offered was a repetition of the statements of the cause no one bought the coal lying.

repetition of the statements of the cause no one bought the coal lying witnesses from other townships. They there, that did not lessen its value all claimed that the land was assessed in excess of its value and that the coal market of Washington county, commissioners in making these assess
be continued, since the panic of 1907. Previous to that quite a silt was rements should not charge them with Previous to that quite a stir was rethe underlying coal from which they couled.

get no income.

Isaac Baum, attorney for the commissioners opened his case by placing Bollean, the mining expert, on the stand. The expert was the star witteness and came loaded with information on the conditions of the coal in the townships in question. He also brought along a map, that showed the levact provided that if anything they were too ness and came loaded with information on the conditions of the coal in long on the valuation placed on the townships in question. He also surface for he was not familiar with brought along a map, that showed the levact progration of all mines and coal.

Baum then ran over the list of coal assessments and asked Mr. Bolling as sevents are considered these validations excessive, to which the expert problem in the considered these validations excessive, to which the expert problem is a surface for he was not familiar with brought along a map, that showed the list of coal assessments and asked Mr. Bolling the considered these validations excessive, to which the expert problem is a surface for he was not familiar with brought along a map, that showed the list of coal assessments and asked Mr. Bolling the considered these validations excessive, to which the expert problem is a surface for he was not familiar with brought along a map, that showed the list of coal in the considered these validations excessive, to which the expert problem is a surface for he was not familiar with the coal in the considered these validations excessive, to which the expert problem is a surface for he was not familiar with the coal in the co brought along a map, that showed the acceptance of all mines and coal Baum then inquired whether he related in the Pittsburg field, who garded the assessment of \$169 for coal Mr. Bolleau said that he William Hough of Canton township.

of the coal. Mr. Bolleau said that he prepared this map at great expense and was constantly adding to it. As it is now it is not much short of "life size."

When Baum placed his star witness upon the stand he stated to the court that it was his intention to prove that all the townships from which the appealing farmers hailed, are underlaid with the Pittsburg and River coal vein and that the coal underlying is of good quality and that the values of the coal and surface placed by the commissioners are not excessive but are fair values for the coal and surface placed by the commissioners for the coal and surface placed by the commissioners are not excessive but are fair values for the coal and surface placed by the commissioners are not excessive but are fair values for the coal and surface placed by the commissioners are not excessive but are fair values for the coal and surface placed by the commissioners are not excessive but are fair values for the coal and surface placed by the commissioners are not excessive but are fair values for the coal and surface placed by the combined was very optomistic on the content of the coal and surface placed by the combined by th are fair values for the coal and sur-

Attorneys for the appellants did not field and he considered it the comseem to care for this kind of testimony ing center. This would happen, he and stated the same to the court but said, when the railroads furnished

declared, of a deal that was under way be assembled multitude on the subject of coal, coal of all kinds and particularly that in the townships and form the porthern part of Washington County.

He began by giving a description of his map which he said was based on his own observations and the reports of the geological survey. It showed that the had only a general of that the coal outcorpoint at point of the that the coal outcorpoint at point fact that the coal outcorpoint at point fact that the review was not there it would be a freak that has never been discovered in this section.

The expert at the request of the count gave a description of the prints of the properties of the country of the prints of the properties of the country of the prints of the properties of the country of the prints of the properties of the conducted a lest, he said, on the four at the four at the four the properties of the country of the prints of the properties of the propert

Gulf. This deflection caused the river mining engineer for the Plitsburg to cut through the coal bens and in places where the water came in places where the water came in considerable portion of the gas considerable portion of the gas constituent of the coal it washed out a considerable portion of the gas constituent of the coal interior quality of coal. Also, in certain portions a layer of slate was deposited, then a layer of slate was deposited, then a layer of coal and sinte and so on. The coal along the river, he said was the best coking quality but as one goes west to the Washington anticline the quality becomes inferior and west of the anticline it, becomes steam coal. This he said was due to the ancelled feducation of the Monary of of the

ganela which washed out a consider able amount of the gas from the coal He said that in Robinson township hey had a grade of coal that could only be sold when there was a big de

When the expert began to give testimony as regards the thickness and quality of the coal under townships the counsel for the appellants objected, saying that the expert could only presume as to where the coul could be found and as to the thickness of the vein, but the court overruled the objection.

Boileau said he was well acquain

ed with the townships from which the appellants came and said he had personally inspected the near by mines and measured the vein, which he found to be on an average of 5 feet to 6 feet 2 inches in thickness and of a fairly good quality. In Cross Creek township, he said, he had put down a few holes and had inspected the Pittsburg & Eric and the Pitts burg & Eastern mines, where bo

found the conditions the same.

He further stated that he found

Baum then ran over the list

ing that he was very optomistic on the future of the Washington coal

## **COAL PRODUCTION** IN ALABAMA STATE.

Nearly 14,000 Short Tons Taken From the Mines

#### DURING THE YEAR OF 1910

State is Singularly Fortunate in Hav ing Home Market For its Coal and Cutput-Prices Compared With Those in West Virginia

The production of coil in Alabama in 1909, 1. 702 450 short tons having a spot value of \$16 305 15) showed an increase of 2098 807 short tons or 151 per cent in quanti y and of \$1 607 267 or 113 per cent, in value over 1908 but was still 547 004 slort tons less than the record of 1907 when the prothan the record of 1997 when the pro-duction amounted to 1, 250 5 is short tons Except that of 1907, however the output in 1909 was the largest in the history of the State The statis ties which have been collected by the United States Geological Survey in cooperation with the Burezu of the Consus indicate recovery from the effects of the business depression of 1907 0 but the conditions were less favorable to the speculative development of new properties than in former recoveries from periody of depre sion During the 1 st three months of the year when the demand for coal was natur ally stimula ed by the advent of cold weather there was some complaint of shortage of abor and during loven ber the car supply was at times insulfi cient to meet the demands but condu tion in this respect improved in De

Since 1904 when most of the larger mines were closed for a considerable period by labor disaffection coal mixing in Alabama has been carried on chiefly on the oper-shop beers. A two months strike among the union miners in the summer of 1908 failed to strangthen organized labor in the State During 1309 the industry is Alabama was not all cied by labor troubles not a single strike suspen

Sion or lockout being reported
Alabama is singularly fortunate in
baving a home market for its coal and coke in the blast fu naces and steel works within i's own borders. The advantages of such a market are plain by exhibited by a comparison of the works within 1's ow! borders

The advantages of such a market are plain by exhibited by a comparison of the prices obtained for 11 banna coal and coke with those for West Virginias products

The average price for Ala bana coal in 1909 was \$1.19 a top bama coal in 1909 was \$1 19 n ton against \$1\_6 in 1908 and \$1 29 in 1907 West Virginia coal which includes

In other words, the value at the mines of Alabama ceal is 30 per center to to President I cats who telegraph more than that of West Virginia and even the most enthusias is Alabamian was permitted to make a complete extension of the c would not say the average quality of Alabama coel is higher than that of West Virginia Similar differences in favor of Alabama are shown in the prices obtained for cole Alabama coel e brought an average of \$2.64 a ion in 190% and \$2.61 in 1909 while the prices for West Virginia coke for the two years is spectry by were \$2 and \$1.55. Of more injustance that this

in 1909 2 met de tilt through explo sions of gas or dust. The most seri out accident of this kind was suppose ed to have been caused by in cylo sion of dist in April at the Short Creek mine of the Briningham Coal Liron Company in which 18 men were Lifted More than half of the total number of deaths were due to fails a roof or coal 70 are being lifted in this way. Ten were killed by powder explosions and windy shots and 25 deaths were due to miscellanious causes. The fatal accidents in the coal miles of Alabama from 189° to the close of 1909 have numbered I 165. The cluses of the accidents and the statistics of injuries of hard accidents and the statistics of injuries of her than fatal. the way Ten were hilled by ponder explosions and windy shots and "a deaths were due to miscellanious" the coal mines of Alabama from 189° to the close of 1909 hard numbered 1160. The circuss of the accidents and the statistics of injuries ober than fart are known only since 1909 when they were first published as all the data which and toen collected by the mine inspectors office exarging the causes of accidents prior to 1906 when destroyed by fire. In the four years from 1906 to 1909 incluse 137 men were littled by explosions of duat or gas 41 os explosions of duat or gas 41 os explosions of powder and 167 by other causes.

The number of mining machines reported in use, in 1909 wis 25b time the quantity of machines in 1909. The accidents wis 10 og in 1900 against to 37 in 1905 The courses of machine mined coal for the total production was 10 og in 1900 against to 37 in 1905 The 25b machines in 1909 michaed as 200 754 short tons against 1735,515 cons by 197 machines in 1909 included as a commission for purchasing and one pick shearing machines of alleged mistakes in the defendant is 1909 5,563 336 short tons and alabamia in 1909 5,563 336 short tons and alabamia in 1909 5,563 336 short tons and a labamia in 1909 5,563 336 short tons and alabamia in 1909 5,563 336 short t

were washed at the mines yielding 5 250 498 tons of cleaded coal and 612 J&S tons of refuse Most of this wash ed coal is used in the manufacture of cohe There are also some washeries operated in connection with colins

plants at points distant from the mires. The coil wished at such plants is not included in this state. ment. The difference of approximate ly 90,000 tons between the production as tesor ed by the Sinto mine inspector art that shown by the returns to the Bureau of the Census and the Geo logical Survey is due to the fast that in several distances the comme cia product reported to the name inspector notice it wishes of the coal before rashing while on the Census Survey schedules the weight of the world

schedules the weight of the wished corlinas given. So far as known the earliest record of the eastence of coal in Alabama was made in 1834. The first statement of production in the State is conturned in the United States census report for 1840, when the production was 946. tons. The census report for 18 0 does not mention any coal production for the State and the next authentic rec ora is contained in the census stitis ties of 1860 in which Alibama is cred ited with a output of 10 200 short tons The mines of Alabama wer probable worked to a considerable ex-tent during the Civil War but their are no turther records of the actual production until 1870 for which 3610 the United States Census reports a production of 11 000 tons. Ten years later the production has increased to 232 9-2 shor tons. But the development of the present great industriedly began in 1881 and 1882 when at tention was directed to the large iron deposits near the city of Burninghan and thus the great boom of that city and vicinity was started. By 1855 the coal production of the State and in creased to nearly 2 00 000 tons. Th for owell a period of recipes and li-quidation which lasted for two veries after which business settle I down to conservative and cational balls and ons since developed standily. The conf production of the State reached a to tal of over 10 000 000 tons in 1902 and attrined the miximum of 14250457 ons in 130

### INSTITUTE A PROBE.

Miners' Officials After Local Officers

the Irwin Field A determined probe into the conduct of the miners union affair, in the Ir win district has been instituted. Carol Lutlejohn national representative of the United Vine Workers was sent there severil days ago by International President Thomas 1 Lewis to make a

excitement among the miners and lat west Virginia coal which includes the high grade product of the Pocahon ras and New River listricts sold for 99 cents a ton in 1907 90 cents in 1908 as in 1908 and about the same in 1909 as in 1908. In other words, the value at the local contraction to in period to permit Littlejohn to in period to permit Littl the book | Littlejohn reported the mil

the years respect to year \$2 and received that widows of men who new \$158. Of more initiating that this come miterial that this come miterial and others have re-

\$1.55 Of more importance than this however is the building up of perra nent communities and elevation of the character of citizenship which manufacturing more than mining insures.

According to Dd Flynn the Stite Mine Inspector there were 120 men killed and 30 injure; in the coal mines of Alabama in 1909 as compared with 108 killed and 35 injured in 1363. The death rate per thousand men employed in 1900 was 64 and the number of toms mine? for each life lost was 306. 514. In 1798 there were 1074-90 tons mined for each man killed and the death rate per thousand employes was 56. Of the total number of men killed in 1903. 2 met death through cycle almost 2000 votes in this district.

## SESSION OF COURT WAS HELD MONDAY

Routine Matters Were Disposed of Before Both Judges.

#### HOTEL LICENSE IS TRANSFERRED

Session Held Today to Give Attorneys and Others Chance to Go to Harrisburg Tomorrow-Decrees in Divorce Handed Down this Morning.

UNIONTOWN, Jan. 16,-Court was in session for a short time this morning with both Judges R. E. Umbel and

Two decrees in divorce were handed down. Jennie Paine, by her next friend Solomon Clifford, was granted a divorce from John Paine and costs expended by the University of the Control of t pended by the libeliant were awarded to her against her husband. They were married about 1887 at Uniontown. In tember court, was directed to pay the December 1895 Faine was convicted of costs. Penitentiary for three years and three months. Mary J. Nichols was the

prosecutor.

Prior to that, in 91, he was convicted of manslaughter, F. M. Stone prose-cuting him for murder. On this charge a period of four years.

a period of four years.

Grace Pattner prosecuted him in 1898 for surety of the peace, but the defendant was discharged upon pay ment of costs. In 1899 he entered a plea of guilty to carrying concealed weapons, Ed Garnett being the prosecutor. The defendant was sentenced to pay the costs and serve 30 days in 1814.

Arrangements have been made for

Jackson for burglary. A verdict of day, February 25, will include Browns-guilty of larceny was returned against ville, Luzerne, Monallen, German Red-Paine and he was sentenced to pay the stone and Jefferson townships costs and serve six months in the During March conferences will be

the costs.

Robert Cutherton brought an assault field townships. and battery charge against him at the September, 1910, term. He pled guilty and served 50 days in Jail.

The libel in this case was filed in

A divorce was granted William E. Kissinger from his wife Ada M. Kis-Assinger from his wife Ada M. Kis. John Hunter and Henry A. Osser, gratify their curiosity wer singer, both of Fairchance.
